SELECTION OF WILD CARD ENTRIES FOR PROVINCIAL “A” & “AA” CHAMPIONSHIPS

The ranking formula is based on the winning percentage of teams against other teams in their division and level and on the participation (exposure to Ontario teams) in tournaments both overall and outside their specific regions in the province of Ontario.

Ranking Formula Based On Two (2) Components

- i. Team Performance
 - Winning Percentage (%) in Sanctioned Events
 - # points earned divided by total # points available
 - 2 points for win, 1 point for tie, 0 points for loss
 - Team performance during sanctioned events is a simple objective measure that directly relates to the competitive level of the team.
- ii. Team Exposure
 - Ensures team performance score is representative of their ranking against most teams in Ontario and supports growth of the sport through more tournaments and increase revenue in local associations.

$$\left[\frac{\text{Total \# Tournaments Entered}}{4} + \frac{\text{\# Tournaments Outside Region}}{2} \right]$$

$$2$$

- iii. Final Score for Ranking = Team Performance x Team Exposure
 - Final Score adjusts the team performance value up or down depending on their level of exposure.
